

Join us at the Social Engineering professional workshop

Terminus System Information Security Workshops & Training Courses Series

LEARN HOW TO FIND YOUR OWN SYSTEMS VULNRABILITIES BEFORE THE BAD GUYS ATTACK THEM

[Register Now](#)

How can you promote your social engineering skills?

We introduce you to key social engineering concepts, the goals of social engineering and a myriad of reconnaissance tools that will help prepare you for successful campaigns. We complete it with exercises centered on the most popular and scalable form of social engineering, phishing.

We focus heavily on payloads for your social engineering engagements. We will cover how to avoid detection, limit the risk of your payloads causing issues and how to build a bespoke payload that works and looks the part of your selected snare. Following that we will introduce another powerful skill with pretexting and cover how these can be combined to get payloads running. We end it with a capture the flag where students can apply their new found skills and a section covering the top dos and don'ts in an engagement.

Is this Workshop for you?

If you have been considering **upgrading your skills in Social Engineering**, this workshop is for you.

This workshop provides the blend of knowledge required to add social engineering skills to your penetration testing portfolio. Successful social engineering utilizes psychological principles and technical techniques to measure your success and manage the risk. This

workshop covers the principles of persuasion and the psychology foundations required to craft effective attacks and bolsters this with many examples of what works from both cyber criminals and the authors experience in engagements.

THIS WORKSHOP IS A 1-DAY TRAINING CURRICULUM THAT PREPARES STUDENTS TO PROTECT THEMSELVES WHILE OPERATING ON UNTRUSTED (PUBLIC) NETWORKS

In this workshop you'll learn how to perform recon on targets using a wide variety of sites and tools, create and track phishing campaigns, and develop media payloads that effectively demonstrate compromise scenarios. You'll also learn how to conduct pretexting exercises, and we wrap the course with a fun "Capture the Human" exercise to put what you've learned into practice. This is the perfect course to open up new attack possibilities, to better understand the human vulnerability in attacks and to let you practice snares that have proven themselves in tests time and time again.

This workshop is an instructor-led, group-live instruction that includes relevant topics and hands-on practical exercises. Scenario-based practical exercises will be performed. Students will be shown how to select from a variety of open source (free) security tools and employ techniques to successfully secure their personal data.

This workshop can accommodate up to 15 students

Key objectives

-) Social engineering introduction
-) The Psychology of Social Engineering
-) Social Engineering Goals
-) Setting up for Success
-) Targeting and Recon

-) Secure & Convincing Phishing
-) Tracking Clicks
-) Secure Phishing Forms
-) USB and Media Drops
-) Building a Payload
-) Clicks That Work
-) Successful Pretexting
-) Tailgating and Physical Access
-) Social Engineering Reports
-) SE: Where it all Fits
-) Risky Business

HANDS-ON TRAINING

-) Recon & Profiling - applying the tools
-) Tracking Clicks - measuring your SE success
-) SET Site Cloning - building a believable phishing site
-) Data Logging - building more advanced credential and data theft portals
-) Roll your own payload - limit risk, avoid detection and prove your pentest
-) Pretty Payloads - making your payloads look the part
-) Pretexting - persuading your way to data
-) Capture the Human - blended SE challenge
